

KNOWING THE UNKNOWN

BEHIND THE MUSIC OF UNIVERSE UNKNOWN

CHAD STEAHLY

"There's something mysterious about the way a collection of disparate recorded sounds when placed over top of each other can make us feel - feel happy, uplifted, reflective. It can remind us of a time that once was or, perhaps, allow us to fantasize about a time that just might be. Music helps us understand the world around us. It can break through social barriers - unite us despite our language, morals, or politics. Music has the power to make the joy of being alive more expressive and, as result, that much more profound of an experience. It can highlight aspects of our life that are enjoyable or painful and help us appreciate or cope with them. It can shine a light on corners of our existence which seem to provoke only questions and no answers. It can urge us to ask "Why?" Push us further into ourselves, into our minds and then back out again into the vast world which we are trying so desperately to understand. A world which we're searching to know, despite our limitations. This is our world. This is our music. This is our Universe Unknown."

-Chad Steahly

It all started very simply. In the Spring of 2012 I began recording a handful of songs which I had written over the past few years. I wanted to document the songs before the words and chord progressions vanished from my memory completely. So, in a sense, *Universe Unknown* essentially began as a musical journal which initially was comprised of only a small handful of compositions. But after I recorded a few of the tracks, I realized I might have a great start to a full-length album. This inspired me. I spent the next year and half writing, recording, and arranging new material, trying to gather a collection of tracks which would work well as one cohesive piece. I ended up writing 12 new songs and recording a total of 20 tracks during the making of *Universe Unknown*. This album was a lot of hard work, and I'm extremely proud of the end result. It's an amalgamation of everything I love about pop, rock, and blues music. From Prince to The Beatles to Michael Jackson to The Rolling Stones - This album displays the influences which have molded me as a songwriter and musician and music addict. I couldn't be more happy with the way it turned out, and I am so excited to share these songs with you all. This digital packet is my way of sharing this album with you in a more intimate way, in hopes that it helps give you a closer look at each song and helps you experience the album as I experienced it while creating it.

This digital packet is your companion to the album. It includes four unique sections which are aimed at allowing you, the listener, a sneak peak behind the machinery of the album and to help you get a glimpse behind the music and story of each track. The first section, The Story, gives you a succinct summary of the story behind each song on *Universe Unknown*, and includes a list of songs and/or albums which inspired the writing and recording of each track. The next section, The Words, provides gorgeous lyric sheets, so you can easily follow along to the words of each song while listening to the album. The third section, The Music, is for you musicians out there. The Music section provides chord charts to each song on the album, so you can easily play along to each track and learn the chord progressions to each piece on *Universe Unknown*. The fourth and final section, The Technology, is a peak into my home studio and the technology used to write and record each song on the album. It includes everything from apps I used on my phone to help me keep the project organized to the professional grade applications I used on my desktop to record and mix the album.

So, sit back, forget your worries, hit play on *Universe Unknown*, follow along with your digital companion, and experience the album as if you're there in the studio watching it come to life. Have fun and I sincerely thank you all for listening.

THE STORY

It all began when...

“UNIVERSE UNKNOWN”

Writing of what eventually became the title track of the album began all the way back in 2005. I was going through a space phase. I found myself watching 2001: A Space Odyssey almost every night, reading about string theory in the afternoons, and listening to Coldplay’s X&Y album on repeat (a very spacey Coldplay album). So, it only makes sense that I would write a pop track about the big questions of life (e.g. what happens to us when we die? are we more flesh and bone?) and tie it all together in a space-themed package. The first draft of ‘Universe Unknown’ was drastically different than the version you hear on the album. For starters, it had a different title. The title of the first draft was the quasi mellow-dramatic “Beyond the Unknown.” The chord progression was fairly similar, but the melody and a portions of the lyric have completely changed.

The sound of the first draft was different also. It had a more mid-2000s alternative-rock sound. Yet, when I got around to rewriting and recording the song during the holiday season of 2012, I decided to take it down a more 80s-pop path. Inspired by a rediscovering of the pop music of my youth, particularly Michael Jackson and Prince, I began studying albums like Bad, Rio, 1999, and Purple Rain to learn more about the sounds of that era, hoping to apply them to “Universe Unknown.” The end result is what you hear. It was a long journey from the stripped alternative rock sound of the mid-2000s to the glistening synth-pop and rhythmic guitar melodies of the 80s, but the trip was well worth it.

Albums and songs which inspired the writing and/or recording of “Universe Unknown”

- Purple Rain (Prince)
- Bad (Michael Jackson)
- Talk That Talk (Rihanna)
- Mylo Xyloto (Coldplay)
- Rio (Duran Duran)

“GRASPING FOR GHOSTS”

The writing of “Grasping for Ghosts” was one of those great moments that songwriters get every once in a great while - when the song comes quickly and you find yourself having composed a new piece without much struggle. In fact, the writing process happened so quickly it didn’t leave much of an impression on my memory. It feels like a tune that was just plopped on my lap one day fully composed. As a result, I thought it was a sign that the song must not be very good and came close to tossing the song aside for good a couple of times. But then I recorded a short demo of the song, and it sold me on the track.

The song itself, on the surface, is a song about lust. The narrator of the track is desperately lusting after a seemingly elusive woman. He discovers in the end that she is merely an illusion, a dream he has created of the perfect woman. The woman is real, but the fantasies the narrator has projected onto the woman are fictional, leaving the narrator feeling empty and tricked by his own mind. In truth, the lustful woman in the song is actually meant as a metaphor for the American Dream. Still, I wanted to make the song work on a couple levels. That's why I tried to write it as a straight forward lust song about a woman. Nevertheless, if you like the woman-stands-for-the-American-Dream message better, than you can jam out to "Ghosts" with that in mind. It's up to you.

Ironically, even though “Grasping for Ghosts” was a song I almost tossed, it was the first song I recorded for the album. After recording the small demo, I realized the potential of the song, and I immediately began recording a full-length version of the track. That’s the odd part about writing music. You can write a song, play it to yourself a million times, but you have no way of understanding its potential and quality until you record it and hear it back for the first time. That’s when you know. That’s when you know you’ve created something really great or you’ve fallen short and the song just doesn’t work. Luckily, in this case...it worked.

Albums and songs which inspired the writing and/or recording of “Grasping for Ghosts”

- Brothers (The Black Keys)
- Before These Crowded Streets (Dave Matthews Band)

“CHANGE”

Out of all the tracks on Universe Unknown, "Change" has had the longest journey from conception to the final version you hear on the album. Written all the way back in 2002, "Change" is not only the oldest song on Universe Unknown it's also one of the first songs I ever completed. I began writing music in 2001, after being inspired by a thorough listen to The Beatles' White Album. I knew after hearing songs like "Dear Prudence," "Mother Nature's Son," and "Blackbird" that I not only wanted to play music but I wanted to compose music as well. The first song I ever wrote was a song called "Now It's Time To Say Goodbye," a slightly sappy tune about saying goodbye to a group of people (I was months away from graduating from high school at the time...so it makes sense). After a few more failed starts, I completed my second song, a five plus minute track written on the piano called "Change." Change was originally meant as a piano and vocal piece, a bit of an alternative ballad type of a track. Yet, as you can hear, "Change," in its current state, could not be further from a stripped alternative ballad, with its thick synth pads, layered vocals, and stacks of overdubs.

Needless to say, the final version of the song, save the chorus, has very little resemblance to the first draft I wrote back in 2002. First of all, the song is about half as long as the original version, cut from 5+ minutes down to only 2:50. I also completely rewrote the verse lyrics and tweaked the melody to make it more powerful. A lot of work went into revising "Change" to make it a stronger song, and I'm really happy with the way it turned out. The version you hear on the album was influenced by some of the ambient electronic pop music I was listening to at the time, namely Neon Indian. I was also inspired by Brian Eno's production on Coldplay's Viva la Vida album, the way he layered Coldplay's vocals to make four people sound like large a choir (particularly on the title track "Viva la Vida"). Another essential influence was John Lennon's "Girl" from The Beatles Rubber Soul album. While trying to rewrite the verse lyrics, I found myself stumped. I didn't know where to begin. That's when I thought of the opening line to "Girl." "Is there anybody going to listen to my story?" I had always loved that line. It's so direct and seems to break that fourth wall. That inspired me to write "Hello, hello, now here's the story" - the opening line to "Change" - and the rest fell into place.

Albums and or songs which inspired the writing and/or recording of
“Change”

- A Rush of Blood to the Head (Coldplay)
- Viva la Vida (Coldplay)
- Era Extrana (Neon Indian)
- “Girl” from Rubber Soul (The Beatles)

“WIND’S GOTTA CHANGE”

I wanted to write a song in a timeless or classic style, something reminiscent of a past era - my favorite era in music history - the 60s. This is the mindset I had when I began to write "Wind's Gotta Change." I submerged myself in the songs of Motown, Solomon Burke, Ray Charles, Stevie Wonder, and Sam Cooke while writing the track. Whether or not the sixties influence is evident or not, this is where it began. There is a song by Solomon Burke called "Cry to Me," and it's one of the best songs I've ever heard in my life. The composition of the track is perfect, and Solomon Burke's performance is so natural and powerful, it reminds you of a time before digital editing - back when you gathered musicians in a room, rolled the tape, and said "Go!" When the song was over that was it. You had a new recording. No overdubs or pitch correction or copy and paste. Just "Go!"

Admittedly, there are plenty of digital loops, synths, and overdubs on "Wind's Gotta Change," but I wanted to take those classic songwriting formulas of the sixties (e.g. verse, chorus, verse, chorus, bridge, chorus) and make it sound a bit more modern. The extended Outro section of the song was actually inspired by The 20/20 Experience by Justin Timberlake. Almost every song on 20/20 vamps into some sort of outro breakdown or shoots off into almost another mini song before concluding. I thought I'd try my hand at this approach by adding a pop/hip-hop beat breakdown to the end of the track which leads us into "Get Cha Coming, Get Cha Going." It also switches the key of the song from a major key to a minor key, helping to ease us into the economical and financial woes of Get Cha Coming's C minor key.

Albums and songs which have inspired the writing and/or recording of
“Wind’s Gotta Change”

- “Cry to Me” (Solomon Burke)
- “The Maker” (Daniel Lanois)
- Greatest Hits (Sam Cooke)
- Yes Indeed! (Ray Charles)
- “Uptight” (Stevie Wonder)

“GET CHA COMING, GET CHA GOING”

I had been wanting to write a song about the pressures of financial burden and the absurdities of the job market for some time. After spending most of my time in low-paying, dead-end jobs and members of my family being laid-off after spending their whole lives working hard to prove themselves just so younger, cheaper employees could be brought in to save multi-billion/million dollar corporations a few dollars, I had had enough and wanted to say something about it. The problem was I wasn't sure how to approach the song.

The challenge with writing a socio-political pop song like "Get Cha Coming" is writing a lyric which expresses your desired message but avoids coming off as preaching to your listener. Nobody wants that. We don't want to be preached to. We want to experience music, have it provide us with a feeling of confidence when dealing with difficult issues or allow to escape, if only momentarily, from the pressures of life. That was the goal for "Get Cha Coming." All I needed was the proper approach. That's when I remembered a phrase I'd heard a million times - "They get you coming, and they get you going." I thought it was a perfect song title, and would centralize the subject matter of the song around a highly relatable phrase. The end result is one of my favorite tracks on the album.

Albums and songs which inspired the writing and/or recording of “Get Cha Coming, Get Cha Going”

- Songs in the Key of Life (Stevie Wonder)
- The Low End Theory (A Tribe Called Quest)

“GOT TO BE A BETTER WAY”

Initially written as an Outro for "Get Cha Coming, Get Cha Going," I decided to separate it and make it its own track. Still, "Got To Be A Better Way" is essentially a postlude to "Get Cha Coming." It's meant to act as a concluding statement on the subject matter of the song. Imagine "Get Cha Coming" as a conversation between two people discussing the current job market/economy and "Got To Be A Better Way" is the last thing said before the conversation dissipates... “There’s got to be a better way.”

The sound of the song was inspired by R&B pop music. I wanted the track to sound like a Marvin Gaye track, something that might have fallen off the What's Going On album and then given a modern twist, hence the finger-snaps and triangle chimes. Whether I succeeded or not, that's for you to decide.

Albums and songs which inspired the writing and/or recording of “Got To Be A Better Way”

- The 20/20 Experience (Justin Timberlake)
- What’s Going On (Marvin Gaye)

“CRY CRY BABY CRY”

I had two things in mind when I sat down to write "Cry Cry Baby Cry." Firstly, I was thinking about The Staples Singers. I had recently discovered their *Swing Low Sweet Chariot + Uncloudy Day* album, and I loved their sound. There is something special about gospel music. It connects to the very basic elements of the human condition, just like blues or soul music does. It's not just in the lyrics but in the sound. The sound of gospel helps you to realize that we're all just trying to survive and why not come together, have a little fun, and embrace our human spirit. This is the sonic-scape I wanted to try to capture with "Cry Cry Baby Cry." That's where I got lines like "Lord have mercy," and "Go on, sweet child." I was trying to create the feel of gospel or soul, and it all started with the discovery of The Staples Singers.

Secondly, I was thinking of my unborn baby. At the time I wrote "Cry" my wife was about six months pregnant with our first child. I had babies on the mind. I was thinking about how difficult life can be at times, and I wanted to use the sound of gospel or soul to communicate how, yes, life can get you down, rough you up from time to time, but that's okay. It's okay to be hurt and struggle a bit. We all do. And it's okay to show that you're hurt. You don't have to be stone to survive. You can show that you're vulnerable and that you're sad. You can go on and cry cry, baby, cry and don't let the world tell you otherwise. "Cry Cry Baby Cry" is a special song for me because of its connection to my daughter, and, yes, the cry that you hear at the beginning of the song is actually hers. It's also special because I enjoy the message of the track. It's all about feeling the way you feel, not being afraid to show, not caring what others think or concerning yourself with any preconceived notions of how we should carry ourselves socially and emotionally. Each one of us ends the same way, so live how you need to live to get the most out of life. As they say, drink now and be merry...

Albums and songs which inspired the writing and/or recording of “Cry Cry Baby Cry”

- *Swing Low Sweet Chariot + Uncloudy Day* (The Staples Singers)
- *Exile on Main Street* (The Rolling Stones)
- *Thriller* (Michael Jackson)

“HIGH RISE MOON”

The title came first. It was just a meaningless phrase that popped into my mind one night while at home watching television. I liked it, but I had no idea what the phrase could represent. That was the challenge for "High Rise Moon," discovering a metaphor which could establish some meaning to the title. I eventually decided to go with the moon-as-a-metaphor-for-life angle and use it to highlight the fleeting nature of our existence. Specifically, I wanted to write about the seemingly western obsession with work over family, money over happiness. Although I don't mention these subjects directly in the track, this was the motivation behind the 'carpe diem' sentiment of the lyric.

The sound of the song was inspired by Adele's 21, specifically the track "Rumour Has It." The arrangement of the song is filled with primal rhythms and tribal vocals. I wanted a somewhat tribal feel and sound for "High Rise Moon." I wanted the song to sound like it was recorded in the middle of a wooded landscape at midnight with the moon high above.

Albums and songs which inspired the writing and/ or recording of "High Rise Moon"

- 21 (Adele)
- Innervisions (Stevie Wonder)

“FOREVER HELLO”

While recording the last half of Universe Unknown I became a dad of a beautiful little girl. "Forever Hello" is for her. When you have kids you suddenly grasp a whole new perspective on time. You no longer think about time as ending when you do. It expands to now include the life of your child and their children, and on and on... It's this new perspective on time that I had on my mind while writing "Forever." The goal of the song was simplicity in regards to message and innocence in sound. It's an extremely simple lyric, and I kept it simple on purpose. I wanted the lyric to be so simple that a child could easily follow along and even sing along.

To convey an innocence in sound I chose the sounds of the 1980s. I was very young during the eighties, and the sounds of the eighties always remind me of an innocent and imaginative era. It's the time of imaginative films like E.T., Back to the Future, Star Wars, The Goonies, and it's a time of great pop music like Michael Jackson, Prince, and The Police. It all reminds me of childhood, and I wanted to bring that feeling of childhood to the track.

Albums and songs which inspired the writing and/or recording of “Forever Hello”

- 1999 (Prince)
- Talk that Talk (Rihanna)
- Angles (The Strokes)
- Magical Mystery Tour (The Beatles)

“BLIND ODYSSEY”

After watching Martin Scorsese’s documentary on Bob Dylan, *No Direction Home*, I wrote down a single phrase in my writing journal - "Blind Odyssey." The film opens with Bob Dylan stating when he was young how he felt he had been born far away from home and, like Odysseus in Homer's *The Odyssey*, had to go on an odyssey of his own to find wherever his true home might be. At the time, this point-of-view made sense to me. I could relate to it. I was in college and didn't really want to be there, I was living in both of my parents' houses which were in separate cities and were 2 hours apart, and I had big dreams of leaving my home town to make it somewhere else in music. It's not a unique story in any way, but it did help me to empathize with Dylan's early years.

The writing process was fairly simple for the song, as the song is simple in its own right. I wanted the song to follow the song structure of B.B. King's "The Thrill Is Gone." I was obsessed with the song at the time, and I wanted to use it as inspiration for the writing of "Blind Odyssey." As a result, "Blind Odyssey," for the most part, follows a very simple minor blues chord progression, with most of the song consisting of variations of the Bm and Em chords. That being said, the recording sessions for *Blind Odyssey* were some of the longest on the album. I was heavily inspired by another blues/rock sound at the time - The Rolling Stones.

If you listen to the way The Rolling Stones arrange the guitars on their recordings, you'll notice how interweaved they are. You'll hear multiple guitars weaving in and out of each, with one taking the lead and then switching back to rhythm while another guitar jumps from rhythm to lead. This is the guitar style I wanted for "Blind Odyssey." This proved to be an ambitious task considering that The Rolling Stones are a band with multiple guitar players. I, on the other hand, only had myself to create the thick wall of guitars I was hoping to accomplish for the recording. It took a little over a month to overdub all the various guitar bits and solos. All I can say is I hope I made Keith Richards proud.

Albums and songs which inspired the writing and/or recording of “Blind Odyssey”

- Exile on Main Street (The Rolling Stones)
- “The Thrill Is Gone” (B.B. King)

- Dark Side of the Moon (Pink Floyd)
- Electric Ladyland (Jimi Hendrix)
- El Camino (The Black Keys)

THE WORDS

Universe Unknown

Verse One:

Drifting through time

Stuck and trying to find out ^{a meaning} ~~a reason~~ to

The words we've heard in the universe unknown

Visions are illusions, truth becomes confusion

There must be a place where we're not forced to face

Every day in the unknown, the unknown, ~~the unknown~~

Chorus:

That is where I want to go

Universe, universe, unknown

UNIVERSE UNKNOWN

Drifting through time
Stuck and trying to find out a
meaning to
The words we've heard
In the universe unknown
Visions are illusions
Truth becomes confusion, only flesh
and bone
There must be a place
Where we don't have to wake up
every day
In the unknown, the unknown

That is where I want to go
Universe, universe, unknown
That is where I want to go
Universe, universe, unknown

In this age of science

Quickly trying to define us
Are we spirit or blood?
With machines that seem
To understand what we don't know
But will they find that life's
More than a state of mind
Beyond hatred and love
There must be a place
Where we don't have to wake up
every day
In the unknown, the unknown

That is where I want to go
Universe, universe, unknown
That is where I want to go
Universe, universe, unknown

When we die do we find out all of
All of the answers why

To all the questions that we've had
since birth
Or do we just float up and become
part of the universe?
When we die do we find out all of the
answers why
To all the questions that we've had
since birth
Or do we just float up and become
part of the universe?

That is where I want to go
That is where I want to go

GRASPING FOR GHOSTS

She moves for me like a vision
From a dream of future wealth and
fame
I see her for only what she shows me
And never for all the lies which
underlie her name

She's my sweet illusion, sweet illusion
But I'm grasping, but I'm grasping for
ghosts
She's my sweet illusion, oh, my
sweet illusion
But I'm grasping, but I'm grasping for
ghosts

Why do I always seem to try
For what I'll never find?

She moves through me then she
leaves me all alone
But her promises keep me blind so I
can't see
That a false image is all I ever will
behold

She's my sweet illusion, sweet
illusion
But I'm grasping, but I'm grasping
for ghosts
She's my sweet illusion, oh, my
sweet illusion
But I'm grasping, but I'm grasping
for ghosts

Why do I always seem to try
For what I'll never find?

I see people falling at her feet
For what they believe
For what they believe her to be
I see people falling at her feet
For what they believe
For what they believe her to be
Well, I refuse to fall like them
'Cause I know that one day
I will turn away

CHANGE

Hello, hello, now here's the story
Of how things cannot stay the same
Once you've discovered you've
become too old
To think you're too young to take the
blame
So, now, oh things are gonna change

You're sick to death of all your
wasted time
You've spent watching life pass you
by without a sound
Just slip, slipping away was never
part of the plan
You look back to try to turn things
around
Saying, oh, things are gonna change
Oh, things are gonna change

You didn't think it could be this hard
You didn't think it could be this hard

Saying, oh, things are gonna
change
Oh, things are gonna change

WIND'S GOTTA CHANGE

Been a hard year and a hard life
These days and months can cut like
a knife, oh, no, oh, no
Been a hard year and a hard life
These days and months can cut like
a knife, oh, no, oh, no

Sometimes I wish I could rethink my
direction and rearrange it all
But someday, someday the wind's
gotta change

Everyday troubles bringing me down
Life's foolish games make me feel like
I'm drowning, oh, no, oh, no
Everyday troubles brining me down
Life's foolish games make me feel like
I'm drowning, oh, no, oh, no

Sometimes I wish I could rethink my
direction and rearrange it all
But someday, someday the wind's
gotta change

Oh, it's been a hard year and a hard
life, oh, these days and months,
they can cut like a knife
Everyday troubles are brining me
down, oh, life's foolish games make
me feel like I'm drowning

Sometimes, sometimes I wish I
could rethink my direction and
rearrange it all
But someday, someday the wind's
gotta change
But someday, someday the wind's
gotta change

GET CHA COMING, GET CHA GOING

Seems these days are crazy
Like there's nothing I can do, baby
To get more money, honey
Or a good job to get us through
Still, the bills keep coming
And they keep asking us for more
But there's no way to make the pay
If they're not hiring below high class
anymore

Feels like I'm carrying the weight of
the moon
They've taken all that we've got, but I
know they'll be back for more soon

They get cha coming, get cha going
They get cha coming, get cha going
They get cha coming, get cha going
They get cha coming, get cha going

They get cha coming, get cha going
They get cha coming, get cha going

Well, the ways these days are
strange
And it all seems like a joke
You work your whole life then at 50
They lay you off and leave you for
broke
Still, the bills keep coming, and they
keep asking us for more
But there's no way to make the pay
If you're not seen as useful anymore

Feels like we're carrying the weight
of the moon
They've taken all that we've got, but
I know they'll be back for more
soon

They get cha coming, get cha going
They get cha coming, get cha going
They get cha coming, get cha going
They get cha coming, get cha going
They get cha coming, get cha going
They get cha coming, get cha going

I don't want to beg
I don't want to plead
I don't want to play a fool to get what
I need
I don't want to rot serving someone
else's dream
And spend my life
Wasting away in a dead-end job with
bills that I can't pay

They get cha coming, get cha going
They get cha coming, get cha going
They get cha coming, get cha going
They get cha coming, get cha going
They get cha coming, get cha going
They get cha coming, get cha going

GOT TO BE A BETTER WAY

There's got to be a better way
There's got to be a better way
There's got to be a better way
There's got to be a better way
Whoa, and if one day you find
That you feel like crying
Go on and, baby, cry cry, baby, cry

CRY CRY BABY CRY

Lord have mercy
Give ya strength to keep ya strong
Without which you may fall 'fore long
Oh, Lord have mercy
They'll soon tell ya hide her tears
But that'll just makes ya sad for years

So, baby, cry cry, baby, cry
Cry cry, baby, cry
Cry cry, baby, cry
Cry cry, baby, cry

Go on, sweet child
You were born into a world pre-made
But that don't make ya no one's
slave
So, go on, sweet child
They'll say your tears make you weak

But these fools never know what to
think

So, baby, cry cry, baby, cry
Cry cry, baby, cry
Cry cry, baby, cry
Cry cry, baby, cry

Oh, child, in this life need to take
what you want
And leave the rest behind

Sleep my child,
Lay your head down for a while
Dream you can fly
Somewhere where you never ever
need to cry, but for now
Cry cry cry, baby, cry

HIGH RISE MOON

Like the moon rising high
At the start of the night
You think you've got forever
'Fore the sun steals your light
So you fill your night with deadlines
and business
Trying to gather which we can't take
with us

When we go
Nothing, no, nothing else matters
except the love we leave behind
When we go
Nothing, no, nothing else matters
except the love we leave behind
When we go
Nothing, no, nothing else matters
except the love we leave behind
So, let the love carry us on home

You think it's another day and the
same old song
And you'll make time later, but
you're wrong
For like the night you'll be gone
soon
You will fall, you will fall, you will fall
Like the high rise moon

You see the stars
Above you in the sky
As devoid of joy and a burden to
organize
You think you'll have time to relax
before the sun comes
So you shine and you shine and you
work and work
But then the sun rises and you're
left lying beneath the dirt

Think it's another day and the same
old song
And you'll make time later, but you're
wrong
For like the night you'll be gone soon
You will fall, you will fall, you will fall
Like the high rise moon

When we go
Nothing, no, nothing else matters
except the love we leave behind
When we go
Nothing, no, nothing else matters
except the love we leave behind
When we go
Nothing, no, nothing else matters
except the love we leave behind
So, let the love carry us on home

You think it's another day and the
same old song
And you'll make time later, but you're
wrong
For like the night you'll be gone soon
You will fall, you will fall, you will fall
Like the high rise moon

Fallen, fallen
We are falling like the high rise moon
Fallen, fallen
We are falling like the high rise moon
Fallen, fallen
(Nothing matters) fallen (nothing
matters)
We are fallen like the high rise moon
(Except the love we leave behind)
Fallen, fallen
(Nothing matters) fallen (nothing
matters)
We are fallen like the high rise moon
(Except the love we leave behind)

FOREVER HELLO

Here we are, and here we always will
be
Whether we're gone or just asleep
And by your side I always will be
Forever hello, hello, hello, hello

I'm with you, and I'm yours to keep
Whether I am near or 'cross the
shining sea
Every day will be you and me
Forever hello, hello, hello, hello

And when you're feeling like the big,
old, bad world has got you down
There's no need to worry because I
will always be around

From every sunrise to smiling moon

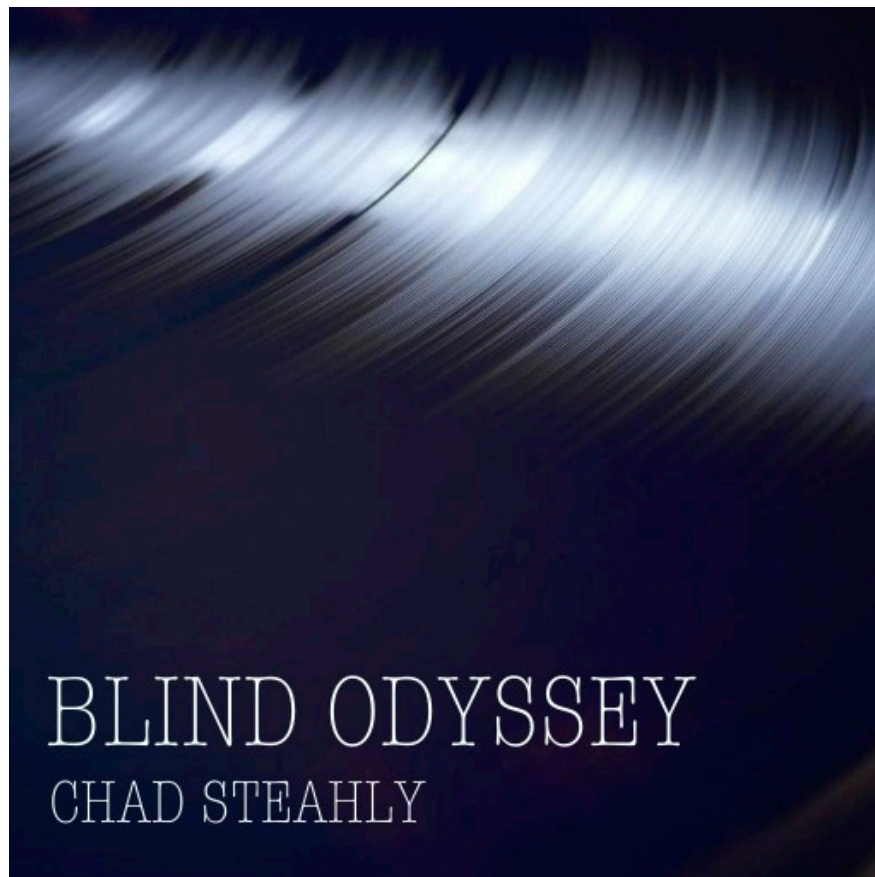

From every sunrise to smiling moon
From every cup of coffee to
midnight too
Every day will be me and you
Forever hello, hello, hello, hello

So here we are, and here we always
will be
Whether we're gone or just asleep
And by your side I always will be
Forever hello, hello, hello, hello

And when you're feeling like the big,
old, bad world has got you down
There's no need to worry because I
will always be around

Never good bye, never got to go
Only hello, hello, hello
Never good bye, never got to go
Only hello, hello, hello
And if someday you should find
yourself alone
Just close your eyes and think of me
And then you will see
That is where I always will be found
And I will always be around

Forever hello, hello, hello, hello
Forever hello, hello, hello, hello
I will always go, I will always go
I will always go where you go

BLIND ODYSSEY

My whole life's been an odyssey
I've gone where I've needed and left
as I pleased
I was born a long way from home
And now I'm trying to find out where I
belong

It seems it's a long way home
It's a long way home
It's a long way home
It's a long way home

I've found comfort in love and money
and faith
And transgressed these illusions
along the way
I've travelled much farther than most
I know

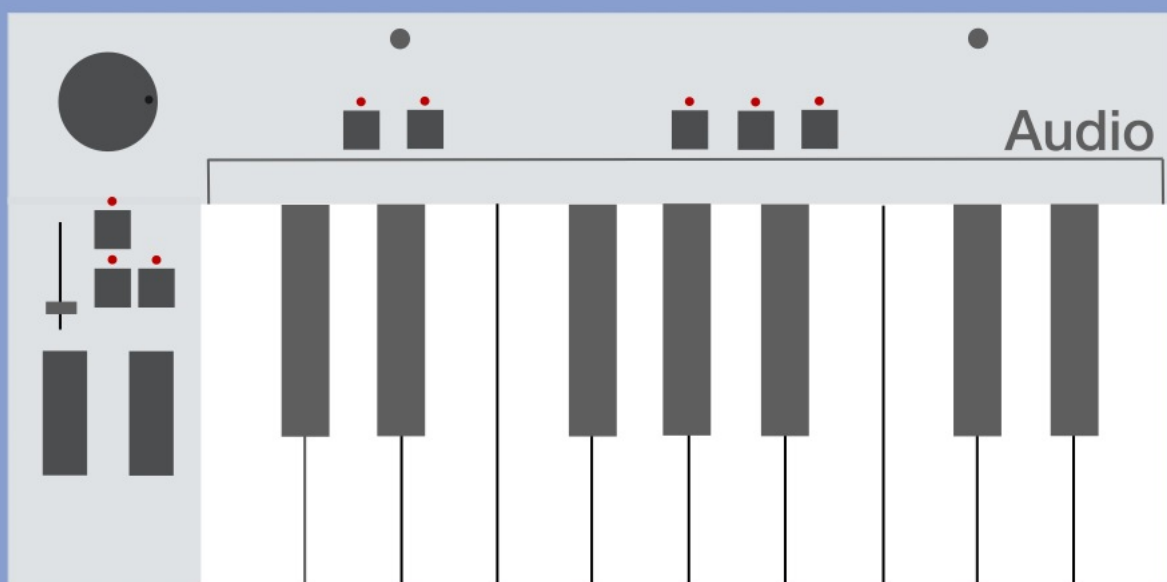

But then most don't care where
they end up or go

But for me it's long way home
It's a long way home
It's a long way home
It's a long way home

How long must I wonder?
How long?

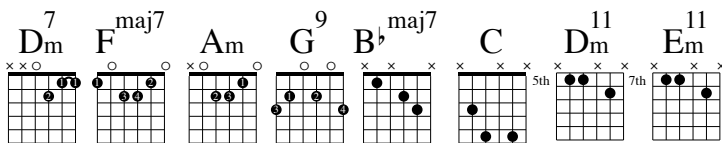

I'm gonna find my way, don't know
where I should be going
But I'm gonna move along before
time claims me
Searching for where I need to go
I'm on a blind odyssey

THE MUSIC

UNIVERSE UNKNOWN

words and music by Chad Steahly

Chords

5 ⁷D_m 6 ^{maj7}F 7 ^{Am}A 8 ^{add 9}G

A musical staff in 4/4 time, measures 5 through 8. Each measure contains a single slash (/) indicating a whole-note chord. The chords are Dm⁷, F^{maj7}, A^m, and G^{add 9}.

9 ⁷D_m 10 ^{maj7}F 11 ^{Am}A 12 ^{add 9}G 13 ⁷D_m

A musical staff in 4/4 time, measures 9 through 13. Each measure contains a single slash (/) indicating a whole-note chord. The chords are Dm⁷, F^{maj7}, A^m, G^{add 9}, and Dm⁷.

14 ^{maj7}F 15 ^{Am}A 16 ^{add 9}G 17 ⁷D_m 18 ^{maj7}F

A musical staff in 4/4 time, measures 14 through 18. Each measure contains a single slash (/) indicating a whole-note chord. The chords are F^{maj7}, A^m, G^{add 9}, Dm⁷, and F^{maj7}.

Drifting through time...

19 ^{Am}A 20 ^{add 9}G 21 ⁷D_m 22 ^{maj7}F 23 ^{Am}A

A musical staff in 4/4 time, measures 19 through 23. Each measure contains a single slash (/) indicating a whole-note chord. The chords are A^m, G^{add 9}, Dm⁷, F^{maj7}, and A^m.

The words we've heard...

24 ^{add 9}G 25 ⁷D_m 26 ^{maj7}F 27 ^{Am}A 28 ^{add 9}G

A musical staff in 4/4 time, measures 24 through 28. Each measure contains a single slash (/) indicating a whole-note chord. The chords are G^{add 9}, Dm⁷, F^{maj7}, A^m, and G^{add 9}.

Visions are illusions...

There must be a

29 D_m 30 A_m 31 D_m 32 A_m 33 $B^\flat$

place... That is

34 C 35 D_m 36 A_m 37 $B^\flat$ 38 C

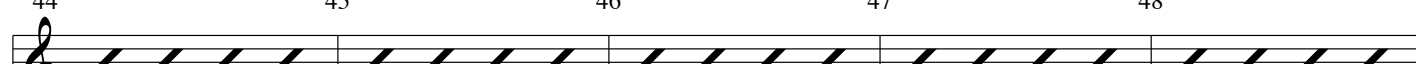

where I want to go That is where I want to

39 D_m 40 A_m 41 D_m^7 42 F^{maj7} 43 A_m

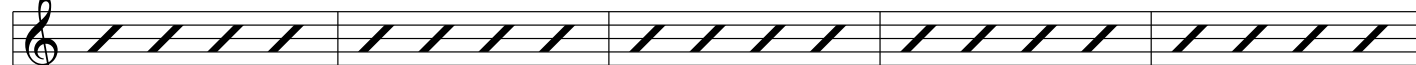

go

THE TECHNOLOGY

THE TECHNOLOGY

A complete list of all the technology used to help write, arrange, record, mix, organize, and market Universe Unknown

APPLICATIONS

EVERNOTE

I used Evernote to store all of my notes, lyrics, thoughts, ideas, and images while writing and recording the album.

CLEAR

An iPhone app which helped me keep track of any mixing changes I needed to make or any additional content I need to create to finish the project/album.

INKPAD

A vector graphic design app for the iPad which I used to create all the vector-related graphics for the album, which includes all the album cover art.

LOGIC PRO

The software which I used to arrange, record, and mix the entire album.

iTUNES

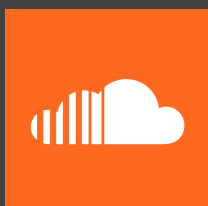

The music storage software I used to store and organize all of my rough and final recordings during the recording of the album.

PIXELMATOR

The photo editing application I used to create and/or manipulate all the images associated with Universe Unknown.

WEBSITES

SOUNDCLOUD

The website I used to share the tracks of Universe Unknown online.

TUMBLR

The blogging website I used to blog about the album.

KICKSTARTER

The website I used to raise the money for distribution of the album.

FACEBOOK

Social media website used to promote the album.

TWITTER

Social media website used to promote the album.

HARDWARE

- iMac (with 8GB of RAM)
- Blue Snowball USB Microphone
- Martin Dreadnought Acoustic Guitar
- Premier Electric Guitar
- Apogee JAM Guitar Input
- M-Audio KeyStudio Midi Keyboard with Sustain Pedal
